

Project Plan

Summary of Project

See Project Proposal

Summary of Methodology

Development and collaboration tools

- Language: Python
- Framework: Django
- IDE: PyCharm IDE 2.1.0
- Github version control system
- Heroku hosting server
- Github issue management (for discussion)

Control change

- After the feature complete milestone, new feature might be considered
- After the code complete milestone, new product source might be added
- All source code commit log messages must refer to a specific issue ID, after the feature complete milestone

Update

This project plan will be updated as needed throughout the project. It will be placed under version control and every team member can get this. Any change to the plan will cause an automatic notification to be sent to a project mailing list.

Deliverables in this release

Codename	Description	Date
Demo 1	Runnable application with at least 3 important use cases	Week 6
Demo 2	All main feature are developed	Week 10
Beta	Deploy on host	Week 14
Final	Complete project	Week 16

Project Planning Dependencies

Does this project conflict or compete for resources with any other project?

No. This is the only project that we are working on.

Are the same human or machine resources allocated to maintenance of past version and/or planning of future versions during this release time period?

No. This is the first release and we will not plan the next.

Does this project depend on the success of any other project?

Yes. This project is a simulation of Engrade Wiki.

Does any other project depend on this project?

No. Project is not producing any components that will be used in other current projects.
